

Calculator Assignment

Create a single view application that operates as a simple calculator.

Requirements

Functionality:

- Addition
- Subtraction
- Multiplication
- Division
- Clearing the input

It should be able to handle basic decimals and display the current input/calculation onto the screen.

UI Design:

- Must contain all the buttons in the sample images
- All buttons must be of equal height and length with the exception of the 0 button being double the width of the others.
- You are free to choose the exact spacing constraints between the UI elements

Sample Images:
